

Jacobs Joinery & Shopfitters

Generator Set

November, 2007

In a bid to ensure that their service to their customers is reliable and dependable, Jacobs Joinery & Shopfitters recently acquired a 400 volt, 50 Hz, 150 KVA Generator Set. The generator is capable of powering up the entire Pietermaritzburg factory, which is necessary at a time when the electricity network has become notoriously unreliable.

This acquisition is an indication of how strongly the company is committed and dedicated to providing their clients with excellent customer service in a manner that has become known as the “Jacobs Way”.

The information in this news article have been made available to general media, industry and trade publications, and are included here as information references relating to various activities of Jacobs Shopfitters.
